## PROJECTS

### Ai Productivity Hub [Link](#)

- Built a full-stack MERN application with **JWT-based authentication**, protected routes, and middleware.
- Implemented a **task management system** with CRUD operations, priorities, due dates, search, sorting, and pagination.
- Integrated an **AI chat feature** to support productivity-related user interactions.
- Developed a responsive **React.js frontend** and integrated RESTful APIs using Node.js and Express.js.
- Ensured secure data handling, validation, and persistence using MongoDB.

### Jobby App [Link](#)

- Developed a React-based job search application with **JWT authentication** and protected routes.
- Implemented job search, filtering, and sorting based on employment type and salary range.
- Built detailed job description pages with company information and requirements.
- Integrated REST APIs, reusable React components, loading states, and error handling.

### Todo Application [Link](#)

- Developed a RESTful backend application with **GET, POST, PUT, DELETE** APIs.
- Implemented advanced filtering using status and priority query parameters.
- Ensured data integrity and structured API design using SQL (SQLite).

### Emoji Game [Link](#)

- Built an interactive emoji memory game using React state management.
- Implemented score tracking, high-score persistence, and conditional rendering.
- Managed dynamic game states for win and lose scenarios.
